

## DC block Specification

| Item                   | Requirement                | Remark |
|------------------------|----------------------------|--------|
| Operating Frequency    | 350– 2700 MHz              |        |
| 3rd Order IMD 2X43dBm  | - 150dBc                   |        |
| Insertion loss         | 0.15 dB                    |        |
| VSWR                   | 1.2:1                      |        |
| Average Power, maximum | 500 W                      |        |
| Impedance              | 50 ohm                     |        |
| DC TEST VOLTAGE(V)     | 1000(INNER CONDUCTOR only) |        |
| Environment            | IP65                       |        |
| Work temp              | -30-75C                    |        |
| Connector              | DIN(m)-DIN(f)              |        |
